The 2024 ESPCG Educational Spring Meeting: Liver Problems Management in Primary Care, Sinaia, Romania 24/05/2024 - 25/05/2024, has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME[®]) with 4.5 European CME credits (ECMEC[®]s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Background and motivation

The ESPCG mission is increasing knowledge and best practice from a primary care perspective in gastrointestinal disorders around Europe. Management of liver disease is an increasing challenge for primary care doctors. Different disorders such as infectious hepatitis, alcoholic and non alcoholic liver disease are a focus for the society to ensure adequate management in different European scenarios. Immigration among European countries is also a recent and relevant factor adding to the need for wider hepatic knowledge. Balkan countries like Romania, represent a challenge for the ESPCG 2024 Meeting. Firstly for its initial involvement as a new member country represented in ESPCG and secondly for its potential need to have this liver programme for their GPs. Participation from other doctors representing near by countries could be expected as well . This presents also a further reason for delivering this comprehensive programme. Collaboration from the European Association for the Study of the Liver (EASL) and from both the Romanian Society of Gastroenterology and Hepatology (SRGH) and the Romanian Association for Liver Diseases (RoALD) are also an important element for the success of the event especially as we will be promoting the shared care approach from the specialist side. Local Romanian GPs Association involvement also represents an important sharing experience from an ESPCG perspective.

Participants

General Practitioners, mainly from Romania. Also potential participation of other GPs from nearby countries will be encouraged and promoted. Between 50 and 100 attendees are expected.

Accreditation

The 2024 ESPCG Educational Spring Meeting: Liver Problems Management in Primary Care, Sinaia, Romania 24/05/2024 - 25/05/2024, has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME®) with 4.5 European CME credits (ECMEC®s). Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

Programme

Topics related to the management of liver problems will be presented from a pannel of expert speakers. Case scenarios from practical practice situations will make participation possible to encourage interaction during the meeting.

Support

The activity will be funded through the Educational Programme of the United European Gastroenterology (UEG). No expected fees will be required to participants.

ESPCG will be promoting the event through its website www.espcg.eu

Friday 24th May
